KiCad E.

4

0.3

Id: 1/7

I/O board first-pass functional capture

- multi-unit connector and op-amp packages are now promoted on-sheet
- balanced receive, mono duplication, wet/dry buffer, and active balanced output legs are captured
- local decoupling placeholders are present, but output RF pads and final bench-tuned values are still deferred

First-pass functional wiring capture

Balanced I/O, mono-to-stereo, wet/dry mix
